PIETERMARITZBURG

Damar Industrial Manufacturers

The enterprise was established in 1998 when the manufacturers of the electrical components needed an alternative supplier to produce components at competitive prices and assured quality.

A large range of specifically designed products are carried in stock. The manufacture of products to client specifications, both with design and material are also undertaken on demand.

Damar manufactures all components in-house. This enables Damar to be able to supply on demand with time efficiency beyond the call. Stock of the products are carried by agents, minimising clients' production loss.

We have a trained work force who take great pride in producing items that are of the highest standards. Our experience and expertise allows us to advise on all technical issues.

If the volumes are feasible we are in a position to manufacture any products to your design or specifications.

Products

All our products can be manufactured from mild steel, stainless steel, brass and plastic and are all available in various sizes.

Hinges

1. Concealed
2. Butt
3. T-hinges
4. Pedestal
5. Brass
6. Available on order -
 - Pin hinges
 - Weld-in or push fit hinges
 - Reinforced polyamide plastic hinges

Locks

1. Cam locks
2. Double locks
3. Coin locks
4. Lever locks
5. Barrel locks
6. Square key locks

Accessories

1. Tongues
2. Shoulder bushes
3. U-handles
4. L pins
5. Locking rods
6. Panel keys
7. Plastic knobs

Component Manufacturing

1. Pressings
2. Casting
3. CNC work
